No.	Command	Explanation
1	`whoami`	Displays the current username.

2	`uname -a`	Displays kernel, OS environment, and architecture information.
3	`df -h`	Shows filesystem disk space in human-readable units.
4	`free -h`	Shows RAM and swap usage.
5	`history`	Displays previously entered shell commands.
6	`man ls`	Opens the manual page for the `ls` command. Press q to exit.
7	`ping -c 4 google.com`	Sends four network connectivity test packets to Google.
8	`hostname`	Displays the system's hostname.
9	`nslookup google.com`	Queries DNS to find information about Google's domain. Requires `nslookup` to be installed.
10	`curl -I https://google.com`	Requests HTTP response headers without downloading the response body.
