bigfile: ASCII text

Here are 10 new Linux commands (41–50) for you to practice in your Ubuntu WSL2 terminal. These are different from the commands you've already practiced and are useful for Linux administration.

10 new Linux commands

Command	What it does	Example
`date`	Displays the current date and time.	`date`
`uptime`	Shows how long the system has been running.	`uptime`
`sort`	Sorts lines of text.	`sort names.txt`
`uniq`	Removes adjacent duplicate lines.	`sort names.txt | uniq`
`cut`	Extracts selected fields or characters from text.	`cut -d',' -f1 data.csv`
`diff`	Compares two files line by line.	`diff file1.txt file2.txt`
`file`	Identifies a file's type.	`file bigfile`
`stat`	Displays detailed file metadata.	`stat newfile.txt`
`ln`	Creates links to files.	`ln -s newfile.txt shortcut.txt`
`sleep`	Pauses a command for a specified time.	`sleep 5`
